End User TNPL (Karur), KCP Pvt Ltd (Chennai), L&T construction (Pithampur, Madhya Pradesh)

Ashley Furniture

- Designed and developed comprehensive transportation management applications (AshleyNet, Transcom, Rate Management, and Planned Transfers) leveraging .NET Core 6/7, Azure Functions, and Azure Service Bus to streamline logistics operations.
- Developed 10+ Azure Functions to handle background processing, scheduled tasks, and event-driven workflows utilizing Azure Service Bus triggers
- Implemented Azure Blob Storage for efficient document management and Azure Key Vault for secure configuration handling
- Connected with enterprise systems including AS400, Mercury Gate TMS, Trimble TMW, PeopleNet, and WMS through REST APIs and message queues
- Applied SOLID principles and common design patterns (Repository, Factory, Dependency Injection) to enhance code maintainability and quality
- Established robust CI/CD pipelines through Azure DevOps with YAML-based automation for streamlined builds, testing, and multi-environment deployments
- Utilized GitHub Copilot and Augment AI to accelerate code generation, testing, and documentation processes
